About Company

We are a firm based in Ludhiana, Punjab, India that specializes in the manufacture and export of high-quality fasteners, comprising Nuts, Bolts, Washers, Studs & Threaded Rods.

We established our company and commenced operations in 2015. Since 2015, we have been dedicated towards producing and maintaining the best standards of quality in our factory according to our customers' requirements. Along with superior quality of our products, we also ensure timely delivery of our products, no matter which part of the world our customers are located in.

Through the years, our experienced leadership team and technologically advanced machines and human resource, we have successfully grown in numerous markets around the globe, with our vision to make Ktech International a prominent name in the fastener market globally.

Infrastructure

We are backed with the most appropriate and advanced infrastructural base, equipped with all latest machinery and advanced tools, which assists us in offering supreme quality range of products. Our team of experts ensures that each product is manufactured from optimum quality raw material to meet international quality standards. Furthermore, our infrastructural base is further divided into various specialized departments such as procurement, manufacturing, quality testing, sales & marketing and warehousing & packaging.

Our Quality

Today, through constant research and development, we have developed all our products up to international quality standards and employed strict inspection parameters inside our workspace. We have a team of quality assurance auditors that keeps a strict vigil on the entire production procedure right from the procurement of raw material till the final dispatch of the finished metal products and ascertain that our products stand high on the parameters of quality.
